Total Features		69 features	

Ticket Management — 11 features

- ✓ 1. Create tickets (web form with help topic routing)
 - ✓ 2. View & update ticket details (subject, description, status, priority, category)
 - ✓ 3. Ticket status workflow — Open → In Progress → Waiting → Resolved → Closed
 - ✓ 4. Priority levels — Critical, High, Medium, Low
 - ✓ 5. Department-based routing
 - ✓ 6. Ticket merging (consolidate duplicates)
 - ✓ 7. Due dates (manual, with overdue highlighting)
 - ✓ 8. Ticket templates (pre-filled forms for common request types)
 - ✓ 9. Help Topics (customer-facing categories that auto-set department/priority)
 - ✓ 10. Bulk actions (assign, change status, priority on multiple tickets at once)
 - ✓ 11. Export tickets to CSV
-

Communication — 9 features

- ✓ 12. Public replies (customer-visible comments)
 - ✓ 13. Internal notes (agent-only, hidden from customers)
 - ✓ 14. @mentions in internal notes (autocomplete agent names)
 - ✓ 15. Canned responses (insert pre-written replies)
 - ✓ 16. CC / Watchers (add email addresses to receive ticket notifications)
 - ✓ 17. File attachments (upload/download files on tickets and comments)
 - ✓ 18. Inbound email-to-ticket (IMAP polling auto-creates tickets from incoming emails)
 - ✓ 19. Outbound email notifications (ticket created, assigned, status changed, comment added, SLA breached, CSAT survey)
 - ✓ 20. Rich email threading
-

Customer Portal — 6 features

- ✓ 21. Submit tickets (with help topic, template, file upload)
- ✓ 22. View own tickets and status
- ✓ 23. Reply to tickets
- ✓ 24. Knowledge base (browse articles, search, mark helpful)
- ✓ 25. CSAT rating (rate support experience after ticket closes)
- ✓ 26. Customer profile (update name, change password)

Agent Tools — 8 features

- ✓ 27. Agent queue (filterable ticket list with search, saved views)
- ✓ 28. Ticket assignment (manual assign to agent)
- ✓ 29. Collision detection (warning when multiple agents view same ticket)
- ✓ 30. Task management (sub-task checklist per ticket with progress tracking)
- ✓ 31. Saved filter views (named filter presets)
- ✓ 32. Link tickets to Issues (group related tickets)
- ✓ 33. Custom field values (fill in admin-defined fields per ticket)
- ✓ 34. Watchers management (add/remove CC emails from sidebar)

Admin Configuration — 14 features

- ✓ 35. User management (create/edit agents, customers, team leads)
- ✓ 36. Department management
- ✓ 37. SLA Plans (response/resolution targets per priority)
- ✓ 38. SLA Escalation Rules (auto-notify/reassign at configurable thresholds)
- ✓ 39. Custom Ticket Fields (text, dropdown, date, checkbox)
- ✓ 40. Canned Responses management
- ✓ 41. Knowledge Base management (categories + articles)
- ✓ 42. Ticket Templates management
- ✓ 43. Help Topics management
- ✓ 44. Email Inboxes (configure IMAP inboxes for email-to-ticket)
- ✓ 45. Email Notification toggles (per event type on/off)
- ✓ 46. Business Hours configuration (start/end time, days, timezone)
- ✓ 47. Auto-assignment toggle (round-robin by workload)
- ✓ 48. General settings (company name, support email)

Organizations — 4 features

- ✓ 49. Organization / Company accounts
- ✓ 50. Group customers under a company
- ✓ 51. Org-level ticket visibility (members see each other's tickets)
- ✓ 52. Member management (add/remove users from org)

Analytics & Reporting — 3 features

- ✓ 53. Analytics dashboard (KPI cards, daily ticket volume chart, agent performance table)
- ✓ 54. 7 / 30 / 90 day date range selector
- ✓ 55. Audit log (full history of all system actions)

Integrations & API — 4 features

- ✓ 56. Outbound Webhooks (POST to external URLs on ticket events, HMAC-signed)
- ✓ 57. Webhook test endpoint
- ✓ 58. API Key management (generate, revoke, one-time display)
- ✓ 59. Issue Tracking (group tickets under a parent issue)

Security & Auth — 5 features

- ✓ 60. JWT authentication (access + refresh tokens)
- ✓ 61. Role-based access control (Admin, Team Lead, Agent, Customer)
- ✓ 62. Two-Factor Authentication (TOTP via authenticator app)
- ✓ 63. Password change from profile
- ✓ 64. BCrypt password hashing

UI/UX — 5 features

- ✓ 65. Dark mode (toggle in header, persisted in localStorage)
- ✓ 66. Real-time notifications (WebSocket/STOMP)
- ✓ 67. Global search (tickets by subject/description)
- ✓ 68. PrimeNG 18 component library (Aura theme)
- ✓ 69. Responsive TailwindCSS layout
